

Die Zukunft ist erneuerbar.

Dr. Jochen Schneider  
fesa e.V., Freiburg

Die Zukunft ist erneuerbar.

fesa e.V. – the future is renewable

# Our motivation

- Scarcity and increasing costs of energetical raw materials (petroleum, uranium, gas, coal)
- Significant climate changes (UN-world climate report)
- Inequity and tensions through the classical energy economy

- Huge unused potential of renewable energies world wide
- Chances through a rise in efficiency of the use of energy

# The reason for our engagement

- To improve the political framework
- To inform the citizens and the decision maker about the the chances of a renewable energy economy
- To exert pressure on the policy-makers for a faster change

- To build up a network of the actors
- Choose unconventional paths for the introduction of renewable energies

Die Zukunft ist erneuerbar.

- is a member-based NGO
- for 13 years active for an energy revolution in the Upper rhine valley
- makes publicity for enhanced application of renewable energies (wind, solar power, geothermal power, bioenergy, energy efficiency)
- performs climate protection by projects (RegionER, Eco-Watt, Prima Klima) and excursions

Die Zukunft ist erneuerbar.

# History

- 1993 foundation of fesa e.V.

## Objectives:

- foundation of an energy agency in Freiburg
- civil participative installations
- 1997 establishing of the magazine „Die SolarRegion“
- 1999 foundation of the Energy Agency Regio Freiburg
- 2001 foundation of the fesa GmbH
- 2002 „Geothermal energy in the Upper Rhine Valley“
- 2005 EU-project „RegioNER“
- 2006/2007 Trinational/International conferences on geothermal energy

# Energy Agency

Energieagentur  
Regio Freiburg

- Objectives:
  - Information
  - Consulting
  - Realisation of pilot projects
  - Knowledge transfer
- Fesa is one of three stockholders, among the city of Freiburg and an association of craftsman

# Civil participative installations

- Solar installations
- Wind installations
- Water installations

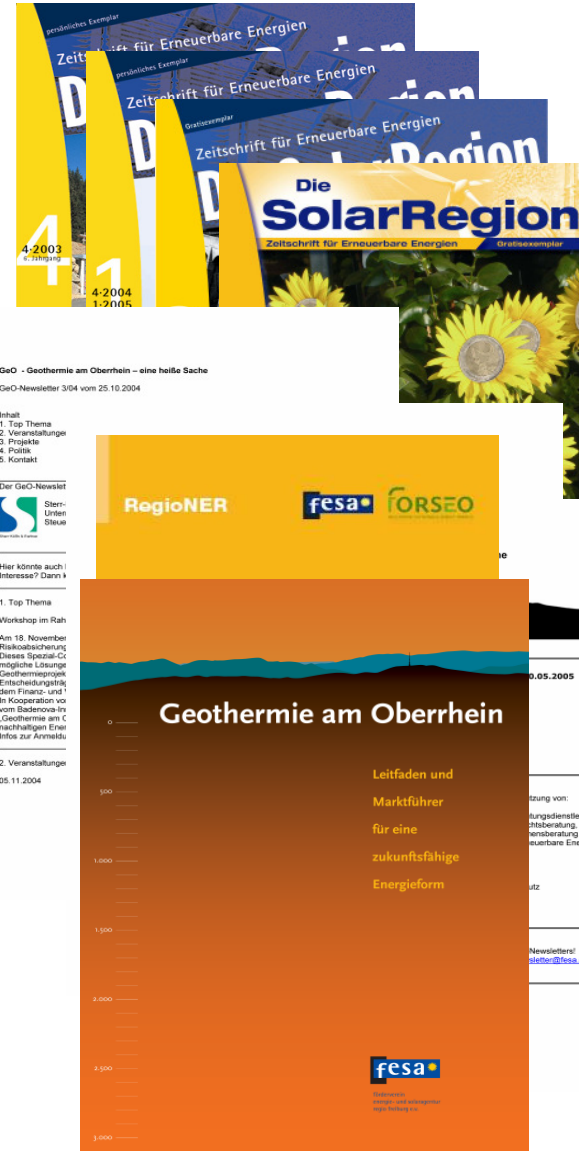

fesa e.V. – the future is renewable

Die Zukunft ist erneuerbar.

# Publicity

- Die SolarRegion  
(25.000 copies)
- Monthly fesa-newsletter
- Monthly GeONewsletter
- Press releases
- Internet-platforms
- Brochures

fesa e.V. – the future is renewable

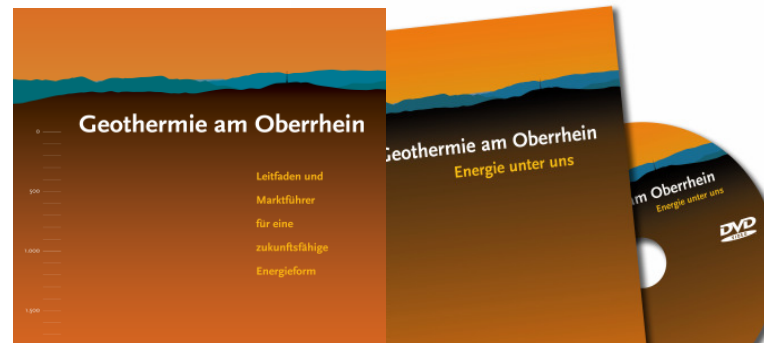

Die Zukunft ist erneuerbar.

# Projects

- Geothermal energy in the Upper Rhine valley
- EcoWatt
- PrimaKlima
- RegioNER
- Mega Watt s

fesa e.V. – the future is renewable

Die Zukunft ist erneuerbar.

# Networking

- Conferences

- Information events and discussions
- Talks with comprehension of our member companies
- Trade fair appearances for our member companies

fesa e.V. – the future is renewable

Die Zukunft ist erneuerbar.

# Members

- Independant persons
- Companies:

Energieagentur  
Regio Freiburg

*(among others)*

fesa e.V. – the future is renewable

Die Zukunft ist erneuerbar.
